Devana

RealTime-Devana is a holistic business intelligence platform designed specifically for research site organizations, driving transparency and accountability across all functional groups. Improve turnaround times and stand out to CROs and sponsors with Devana's **powerful workflow improvements and data analytics.**

| Metrics Capture & Data Analytics | Automated Study Start-Up | Devana Enterprise for Site Networks | Pipeline Management | Trial Management & Monitoring |

| **29.7 hrs** saved per week | **40%** increased revenue | **58.6%** ROI | **14.25 hrs** saved per study activation | **76%** reduced contract and budget turnaround time |

Metrics Capture & Data Analytics

Track progress with real-time data, impress sponsors with powerful reporting, and leverage historical data to secure future opportunities.

Automated Study Start-Up

Streamline study start-up with automation, real-time milestone tracking, and collaborative tools to get trials running faster.

Devana

Devana Enterprise for Site Networks

Empower sites, streamline communication, and gain real-time insights to optimize performance across your entire network.

Pipeline Management

Track leads, automate outreach, and gain data-driven insights to maximize trial opportunities.

Trial Management & Monitoring

Gain real-time transparency into trial progress, enrollment, tasks, and performance - all in one secure platform.

Velocity
CLINICAL RESEARCH

Case Study: Velocity Clinical Research

RealTime-Devana serves as the **central repository for all trial data and communication** at Velocity, allowing their central team to easily push opportunities and updates to sites, and gives sites the ability to respond in real-time within the platform—eliminating the need for duplicate emails, phone calls, and meetings, resulting in **staff cost savings of over $100,000 per year**.

BEFORE DEVANA:	AFTER DEVANA:
Disparate systems at each site	**Centralized platform** for business intelligence
No trial oversight by central teams	**Trial transparency** in real time
Lacking metrics for performance	**Robust reporting** and dashboards
